EGG PACKAGING PRODUCTION

EUROPACK offers the highest quality **rePET** and **Moulded fibre** egg packaging

TOMA
RECYCLING

EP EUROPACK

1990s

BEGINNING

Europack, as a joint-stock company was founded on December 11, 1991. The company began to achieve success in domestic and foreign markets.

2000s

EXPANSION

By 2000 the key products had emerged as dairy and also egg packaging. The company built a distribution network throughout Europe.

2010s

INNOVATION

Europack has become one of the largest manufacturers of egg packaging made exclusively out of **100% recycled PET** material in the world.

2020s

RENEWAL

New member of the Prosperita concern. This provides new opportunities for development and expansion, with an added recycling centre in Czechia.

ENERGY / ENVIRONMENT SAVING TECHNOLOGY

Europack is using new technologies for the production of egg packaging directly from recycled PET flakes, which saves a relatively large amount of energy in the production of granulate, which has a positive impact on the environment.

UNIQUE PRODUCTION PROFILE

Europack decided to build a new division for the production of packaging for eggs from recycled paper and thus become the only manufacturer of both types of packaging (**rePET**, **Moulded fibre**) in Europe.
